Unleash the power of
AI in your organisation

Introducing One Beyond's AI Assessment

ONE BEYOND

Are You Ready To Make Your Business Smarter?

Whether you're building a new platform, optimising an existing application or improving processes; our AI Assessment helps you identify where and how artificial intelligence can deliver measurable impact.

The importance of getting an AI Assessment

In a world where AI is transforming industries, staying ahead means knowing what AI tools are right for your customer markets and where to find process efficiencies. Our experts dive into your current software architecture, business goals, and user workflows to uncover high-value opportunities for AI integration — from automation and personalisation to forecasting and anomaly detection.

What We Evaluate:

- Business workflows & user journeys
- Data availability, readiness & quality
- Opportunities for automation, intelligence & enhancement
- Readiness for machine learning, NLP, or computer vision
- Current software architecture & infrastructure

Who It's For:

- Startups and scaleups looking to infuse AI into MVPs
- Enterprises modernising legacy systems and processes
- Product Teams exploring data-driven features
- Tech Leads & CTOs seeking innovation opportunities

Our Deliverable: A strategic, Actionable AI Roadmap.

We deliver a custom report detailing:

- Feasible AI use cases tailored to your goals
- Required data and system prerequisites
- Technical outline
- High-level costings and timelines

Make your software work smarter and harder

Why One Beyond

We're the UK's leading software development company with an AI first approach to application building and process modernisation. Our mission is all about growing our client's businesses.

200+ Team:

One Beyond's **AI Assessment**

▌Our AI Assessment Process

1

Introduction & Insight Call

We meet with your stakeholders to understand the challenges across the business, your technical environment and your goals

2

Use Case Ideation & Validation

We identify high-impact AI opportunities and validate them against your business metrics

3

Prioritisation Plan Meeting

To talk through priority use-cases, growth opportunities for your organisation and architecture improvements

4

AI Strategy Report

A report covering our findings, with business opportunities and recommendations with timelines and costings

▌We Deliver Real-World Results

Social Media Platform

Challenge: Delivering highly personalised video content for millions of users

Result: Implemented autotranscripts for system input and human-like voice conversational output

Impact: Creating a world-class interactive user experience

Car Hire Brand

Challenge: Large amount of repetitive document gathering

Result: Built document intelligence system with AI facial recognition + AI Bot Service

Impact: Saving considerable hours per week and data accuracy improvements

Leasing Business

Challenge: Admin heavy tasks around setting up agreements and gather documents

Result: AI feedback analysis, data warehousing and lease renewals system

Impact: Significantly enhanced customer experience

▌What Makes Us Different?

AI expertise across domains - ML, NLP (LLM & RAG), Computer Vision, GenAI

Product-focused - not just tech for tech's sake

Realistic, budget-conscious, and scalable recommendations

We speak both code and business

CYBER ESSENTIALS PLUS

We're ISO 27001 and Cyber Essentials Plus. Security is front and centre of our DNA.

Let's turn your ideas into intelligent solutions.
